DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 11/14/2006, with respect to claim 13 have been fully considered and are persuasive. The 112 rejection of claim 13 has been withdrawn.

Allowable Subject Matter

Claims 1-4 and 13 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, describe or reasonably suggest the claimed invention, specifically in regard to a first fixed damping member and a second movable damping member up and down movably fitted into a second groove and selectively coming into contact with the inner surface of the cylinder, which is dependent on the width size of vibration transferred to the tub.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Two prior art references not referred to but considered as related are Tangorra (US 4583621), who discloses a movable damping element, and Shibahata (US 6053291), who discloses a magnetized damping element, which is movable horizontally.
